The Biologique Recherche methodology

Based on forty years of experience, it is based on unique and personalized care protocols according to the Instant Skin© of each individual. Adapted to all, Biologique Recherche treatments are always carried out in three fundamental phases:

The Assessment Phase

Before your treatment, the Biologique Recherche expert performs an in-depth dermo-cosmetic diagnosis to identify the evolution of your Skin Instant©. This diagnosis, carried out in a tactile and visual way, makes it possible to define the most suitable protocol.

The Initialization Phase

The treatment protocol begins with an individualized preparation of your skin and follows a precise and rigorous ritual based on :

- A thorough cleansing of your skin associated with a massage.
- A preparation of your skin with the P50 Lotion, the brand's iconic product, and the application of a mask.

The Care Phase

This phase includes the products with the highest concentration of active ingredients, to "recondition" the epidermis and help it express its power of self-regeneration:

- The application of a cocktail of pure Authentic Serums adapted to your Instant Skin © by the Biologique Recherche expert.
- The care and finishing step allowing to fix and optimize the action of the care by the complementary contribution of plant or marine bio active ingredients, creams and finishing serums adapted to your skin and its needs.
